The Story of some animals

# Synopsis

During a journey, the carriage of the Marquis of Belleville lost one of its trunks. When trying to retrieve it, the chamberlain found the trunk empty. Certain forest animals discovered the clothing inside, and something unheard of happened; their bodies changed and magically adapted to the delicate wardrobe, changing their body postures and manners... but they retained some traits of their animal character.

# Description

Traveling show in the form of a fable, narrated and guided by Masié Chanbelan. Throughout the journey, the story of the discovery of these dreamlike animals with human bodies is presented. The audience is closely involved in this fable as they discover the narrative of a surprising tale. We will also discover the games that they like to play the most, and when the music box plays, they all look for a partner to dance the waltz of the dreamlike animals.

## Direction

Luis Miguel Pardo

## Costume
